DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1, 18 and 36-39, drawn to "the implementation of detecting and diagnosing impairment in a communication channel due to interference", classified in class 379, subclass 1.01.

II. Claims 2-17, 19-24 and 60-76, drawn to "method for training a communication", classified in class 375, subclass 231.

III. Claims 25-29, drawn to " the implementation of detecting event change in communication channel", classified in class 370, subclass 252.

IV. Claims 30-35, 77-82 and 96-101, drawn to " the implementation of detecting and compensating a disturbed channel", classified in class 375, subclass 348.

V. Claims 40-59, 83-95 and 102-114, drawn to " the implementation of an event notification received from a transceiver at a line card", classified in class 379, subclass 22.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV and V are related as combination and subcombinations.

Art Unit: 2642

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the implementation in one of the recited groups can be processed without requiring the support of other groups. In short, these five groups can be implemented independently.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II, Group III, group IV or Group V and vice versa, restriction for examination purposes as indicated is proper.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
